Hi, I’m Rini

a Virtual Assistant with **10+ years** of experience in **banking, sales, business operations, and client support**. I help businesses stay organized, grow their audience, and maintain strong customer relationships.

Alongside lead generation, I also support your business through **social media, lead generation, email and calendar management** to keep operations running smoothly, email marketing to nurture your audience, **market and competitor research** to support better business decisions.

For the past 6 years, I have also been a **Business Owner** in the **beverage industry**, managing customer enquiries. This hands on experience gave me a strong understanding of both the marketing and operational side of running a business.

With a system driven approach, I don't just assist with tasks, I help you build structured processes to improve your brand presence and create more meaningful customer connections.

Let's take a closer look at how I can support both the marketing and operational side of your business.
